This morning [Americans for Tax Reform \(ATR\)](#) posted a table on their blog, [Friends of ATR](#) , which shows how much your taxes will increase if the Democrat's proposed \$400 billion tax increase goes into effect. In the years following the Democrat's tax increase, Americans would pay an average of \$3,035 more per year than they currently are. The table has the data for each state. Californians will see an increase of \$3,331. Follow this link to see how much more you would have to pay:
